ENDLESS POSSIBILITIES

MOONCLER®

OUR CONCEPT & MISSION

MOONCLER lets his CHICKEN out to go to the moon instead of ending in jackets. We are developing a coin specialized for a confidential paying method for luxury services and goods. To secure that the currency is being held, the token seller must pay a 10% fee 5% are going to all CHICKEN Holders out there; the other 5% will go back in the liquidity Pool. So, it's important always to stay a CHICKEN instead of ending in Jackets.

The absolute game-changers in the crypto market are multi-currency swaps and multi-currency bridges. NFT`s, CHICKEN, Games, and much more for the community! The power of all people in the community is with him. Be a co-founder from the beginning and the owner of your own Liquidity-Pool. Really be your own bank!

Bitcoin was indisputably the first cryptocurrency on this planet. Many more have been created in the name of this inspiring idea. Real DeFi is the future!

The Mooncler-project is 100% run on its community!

While the term DeFi literally includes the word decentralized, this is about economic status instead of its internal hierarchy. Mooncler is a project in decentralized spontaneous community building. This is a concept that will start a revolution.

Projects built on the foundation of community involvement are our future. The rigid financial structures and traditional mindsets are water under the bridge. In a world ruled by hate, anger, and greed, community-run projects are the solution to get an actual together.

The Ecosystem of Mooncler is our way of recognizing the importance of community building. Everyone may, can, and should participate. Together we change the world. A community is held together by hundreds of thousands of interconnected people. True strength comes from working together in harmony. Our drive is the community that can overcome all hurdles.

Together we don't only leave the hamster wheel but also the cage. Feel the freedom in the community of Mooncler.

MOONCLER®

THE END OF A FINANCIAL APARTHEID

We are standing at a historical moment in history. Central banks have printed more money in recent years than at any time in human history before. The inflation spiral is turning faster and faster, and people are noticing that they can afford less and less. Until now, centralization has been a prerequisite for all our official structures.

Until now, people have had to submit to this centralized system and expose themselves to the danger of FIAT currencies. Together we don't only leave the hamster wheel but also the cage. Feel the freedom in the community of Mooncler.

There have been times in our history where this sort of central structure played an important role. Still, in an age with the world's information available at the click of a button, it's time to rethink. History tells us that since Satoshi Nakamoto was inspired to invent Bitcoin, the world became a different place. He gave the impetus for a new world.

Now it's up to our community to make the best of it. Since 2020 at the latest, it must be crystal clear to everyone that the future, including our very cherished freedom, lies in a decentralized system. As a strong community, we now have the ultimate chance to change the world – and with Mooncler, we could do so.

2021 will be the year in which even more things will change and have already changed. We saw how WallStreetBets managed to put greedy hedge fund managers in their place. It was a minor success, but it was immediately diminished by centralized institutions.

We asked ourselves at this point, "How could it come so far, and how is our freedom constantly being curtailed?"

MOONCLER®

But despite all the apparent gains of the centralized systems, something had happened. A thought had settled deep into the people's minds: As a decentralized community, it is possible to make the world a wonderful place. And this thought is invincible. As invincible as the thoughts of Nelson Mandela back then, who also knew very well that the time of apartheid was coming to an end.

We think that the idea of a life of freedom and happiness is the birthright of every human being. The centralized systems and the people who control these systems in the background have always been spreading thoughts of envy, greed, and inciting people among themselves. War, hunger, and injustice are things created by this centralized system.

Planet Earth has been nearly destroyed by the predatory capitalism of the last decades. People get killed by this system of injustice, but also, our nature was brought to the limits of tolerability. However, through decentralized opportunities like Mooncler, we can put this terrible past behind us and for all and move into a brighter future than we can now imagine. With decentralization, the rules of the game have changed forever. People's natural and powerful voices can decide for themselves what and how this planet will be shaped. Be brave and become a part of the unstoppable Mooncler-Community.

You will become the William Wallace of your time!

MOONCLER®

WHO YOU CAN BE?

Who we are is entirely irrelevant! But what we do as a community is of historical scope. Once an idea becomes more significant and more prominent in people's minds, a positive change in the world has already happened.

All we must do as a community is bring the idea into our reality. We are convinced, down to our smallest cell, that this is feasible.

If you are someone to whom the following things apply, then WELCOME ONBOARD!

You are a DEFI-Fighter if you

- keep going when others have given up
- offer your best ideas to the community in the DeFi-Flow. We are victorious!
- never rest on your achievements and always want more!
- accept your strengths and weaknesses and use them. We are victorious! Decisive for the benefits of the community
- Be driven by addiction for a euphoric feeling of success.

We don't need another Elon Musk to be successful. Elon is alone, and he is part of the old system. We appreciate Elon as part of the new but overly cautious thinking. Still, we are convinced that we are much more successful as a community than as a single individual. It has always been that way, and it always will be.

We also do not send our CHICKEN to Vitalik Buterin or CZ to get the attention of the system media. This would contradict our decentralized values.

Again: We believe in the community and the efficiency of billions more than the headlines of a view hundred or thousand centrally controlled media. Sorry, Elon. We are children of the infinite universe, not of the small-minded earth.

PICASSO? – NFT

When Mooncler inspired us to write this Moonpaper, we were unsure whether we should also offer the community the possibility of NFT's. But then Jack Dorsey himself sold his first tweet as an NFT. Hand-signed. Then we knew: NFT's are a must-have for the future. What is an NFT? What does NFT stand for? A non-fungible token.

We know that: It doesn't make it any clearer. „Non-fungible“ more or less means that it is unique and cannot be replaced by anything else. For example, a bitcoin is fungible - swap one for another bitcoin, and you have precisely the same thing. A unique trading card, on the other hand, is not fungible. Mooncler-NFT's can be created using the Binance Smart Chain. An NFT is also a part of that particular blockchain, making it absolutely unique. NFTs can really be anything digital (e.g., drawings, music, Instagram postings, your child`s first picture). Still, much of the current excitement revolves around using technology to sell digital art.

NFT's are designed to give you something that can't be copied: ownership of the work. Though the artist can still retain the copyright and reproduction rights, just like with physical artwork. To put it in terms of physical art collecting: anyone can buy a Picasso print. But only one person can own the original.

If you are an artist, that's your chance! Way to go. You might be interested in NFTs because it gives you a way to sell work that there otherwise might not be much of a market for. If you come up with an excellent digital sticker idea, what are you going to do?

NFTs have features that you can enable that will pay you a percentage every time the NFT is sold or changes hands, making sure that if your work gets super popular and balloons in value, you'll see some of that benefit.

If you are a buyer, you can make much money too. One of the obvious benefits of buying art is that it lets you financially support artists you like, and that's true with NFTs (which are way trendier than Telegram stickers). Buying an NFT also usually gets you some fundamental usage rights, like posting the image online or setting it as your profile picture. Plus, of course, there are bragging rights that you own the art, with a blockchain entry to back it up.

MOONCLER®

If you are a collector, NFT's can work like any other speculative asset, where you buy it and hope that the value of it goes up one day so that you can sell it for a profit.

To be honest: Speculation is good business and has always been there. Mooncler will have the best options for you here as well.

MOONCLER®

CHICKEN – MATTER

Cryptocurrency markets are currently saturated with different coins, which are now a lot that it is challenging to keep track of each currency individually. Currently, there are more than 10,276 coins available.

Cryptocurrency fans invest a lot of time and effort in interpreting the charts of various coins, spending much time studying multiple cryptocurrency forums, reading Twitter, and collecting information about coins from other sources to predict market trends and make good things.

Cryptocurrency markets are volatile, which makes the task of predicting the rate of a crypto asset even more difficult. Various forms of misinformation or even false promises from the developers of multiple coins often stop traders from seeking profits in the cryptocurrency markets.

Let's say you're a busy chicken. You have already collected many Mooncler, and you are proud of your success. For some time, you have been thinking about getting even more Mooncler on the one hand and how you can make the benefits of lots of chicken palatable to your colleagues on the other. Then you discover a possibility.

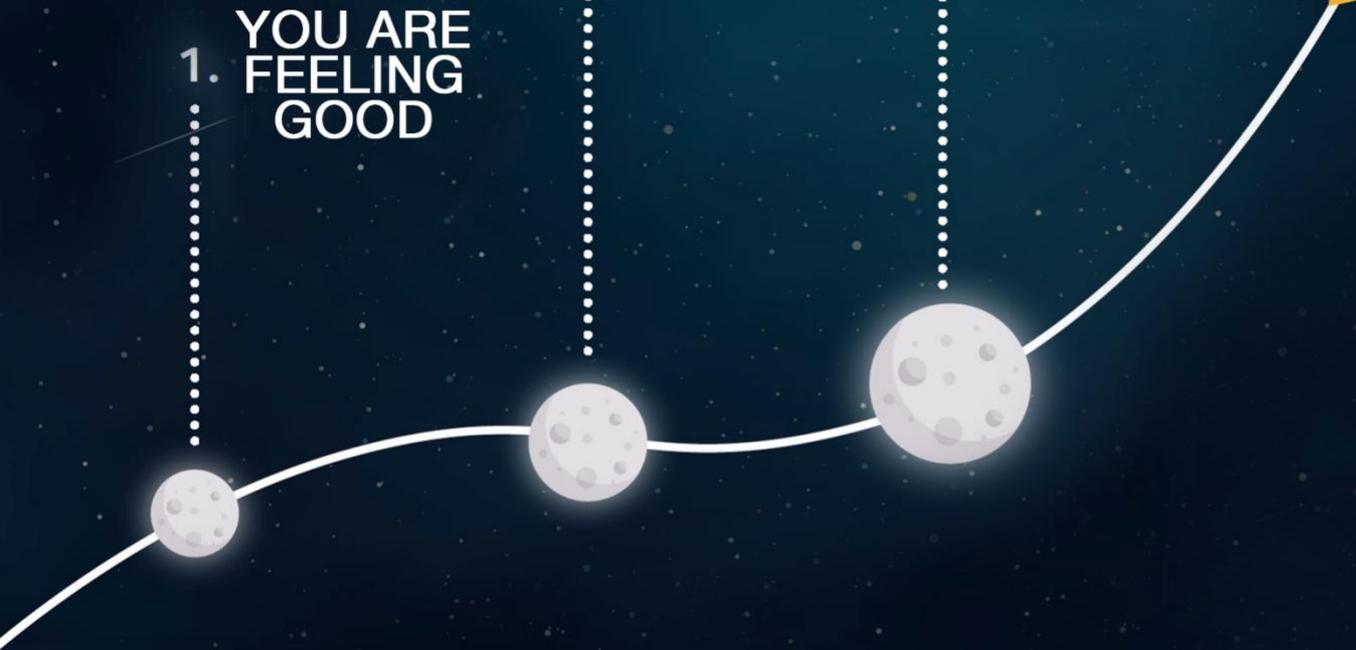

You provide liquidity with your chicken and create your liquidity pool with a few mouse clicks. Now everyone in the community has won because a new opportunity for decentralization has become real. Then you discover a possibility. You provide liquidity with your chicken and create your liquidity pool with a few mouse clicks. Now everyone in the community has won because a new opportunity for decentralization has become real.

1. YOU ARE FEELING GOOD

2. YOU HAVE A LOT OF CHICKEN

3. CREATE A LIQUIDITY POOL

ENDLESS POSSIBILITIES

The sun will undoubtedly rise every day. It is just as confident that through the unlimited power of our strong community, it is possible to make Mooncler-Swap an extravagantly large project. The goal of Mooncler-Swap is to provide a sort of Crypto-Fort Knox to trade your valuable cryptocurrencies while keeping them decentralized. Absolute loyalty in our community is the recipe for success to grow extravagantly.

We will constantly scale this decentralized ecosystem towards the universe to bring more interested parties to the Mooncler-Swap platform. Our extraordinarily decentralized tokenomics, exquisite design, technical implementation, and viral growth triggered by our creative community are a guarantee for the success of our project.

Of course, it is challenging to implement such a gigantic project with only a few financial resources, so we appreciate any help and support from the ever-growing community. Not the moon, not Mars, or any other small planet or stars of our tiny little galaxy is the goal, but the infinity of the whole universe!
